

The need for Total Data Management in Big Data.

Data Integration

- Ingest data at any speed
- Process data flexible & repetitive
- Deliver data anywhere

Data Governance

Your Big Data is not a trash bin.

Your Big Data is not an island.

Data Protection

- Classify
- De-identify
- Protect

90% 2017

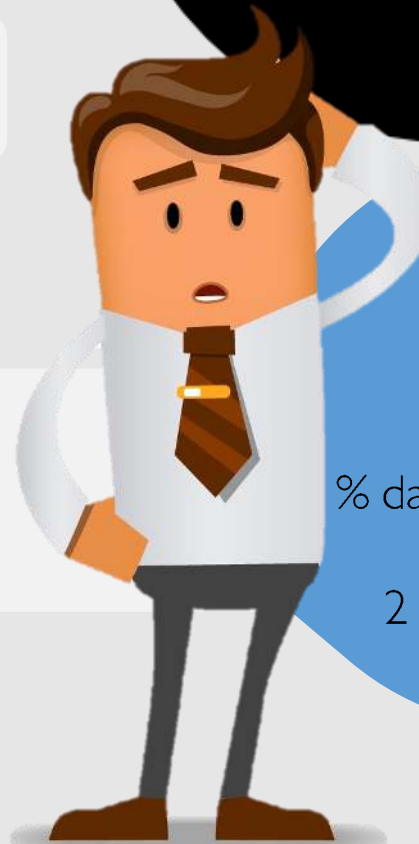

information assets from big data analytics efforts will be siloed and unleverageable across multiple business processes

(1)

26% x2-3

% data to be inaccurate. Big Data reality 2 to 3 times worse
